Start: 5/7/2019 8:00:00 PM
End: 5/7/2019 9:00:00 PM
Show Time As: Tentative

Hi Brad,

I talked to you last summer about your site in Chicago, S.H. Bell, and the yard removal work you were planning. I can't remember how much I detail I gave you about our project, but we have a site that is selling material for residential landscaping that has levels of manganese above residential screening levels. We have a few questions about how you are navigating the evaluation of Mn and risk for your site.

Will Folland, our toxicologist on the issue, is copied on this invite and may want to further elaborate on our questions ahead of time, but I will leave that up to him.

If this time does not work for you, feel free to let me know what days/times work better. I would schedule this sooner, but our coworker Tara is out of the office until 5/6 and we would like to include her.

Thanks!
Amy
